Sydney Lannin

720-503-8800 | Sydney@Lannin.net | www.linkedin.com/in/Sydney-Lannin

Senior at the University of Colorado Boulder, with technology risk experience at EY and a strong foundation in data analytics, understanding human-technology interaction, and computing.

EDUCATION

Bachelor of Science in Information Science August 2023 - Present
Minor in Philosophy
University of Colorado Boulder

- **Relevant Courses*:*** Information Ethics and Policy, Applied Machine Learning, Information Visualization, Philosophy and Ethics of AI, Programming for Information Science I & II.

Study Abroad
Universidade NOVA de Lisboa, Lisbon, Portugal January 2026 - May 2026

WORK EXPERIENCE

Technology Risk Intern June 2026 - August 2026
EY (Ernst & Young), Denver, CO

- Supported IT audit engagements for two clients in EY's commercial industries group within the Assurance practice.
- Joined control walkthroughs with client personnel and documented walkthroughs of IT general controls (ITGCs) and IT application controls (ITACs) to support SOX and ICFR compliance.
- Won EY's intern AI challenge with a team of four by building a three-part Microsoft Copilot agent that helps technology risk professionals prepare, document, and reflect on walkthroughs.

Host April 2024 - January 2026
Japango Restaurant, Boulder, CO

- Managed guest flow and seating in a high-volume restaurant, keeping wait times low during peak service.
- Adapted to shifting reservations, walk-ins, and unexpected issues while keeping service calm and organized.

RELEVANT PROJECTS

National Parks Visitation & Impact- Interactive Data Story

- Designed an interactive data story in ArcGIS StoryMaps with a team, examining how National Park Service visitation affects park ecosystems and local economies.
- Designed an interactive Tableau choropleth map showing four NPS economic impact metrics by state, one of six visualizations.
- Iterated from sketches and low-fidelity prototypes through user testing with people outside the class, adding tooltips, legends, and annotations based on feedback.

Public Attitudes Toward AI- Qualitative Content Analysis

- Analyzed 5800+ YouTube comments on *The A.I Dilemma* with a three-person team to understand public sentiment about AI risk.
- Manually coded a sample of 45 comments and identified seven themes, including anxiety and powerlessness, calls for regulation, and AI as an existential risk.
- Cross-checked themes against AI-assisted analysis of the full dataset, surfacing two new themes.

COVID-19 Testing Data Infrastructure- Informatics Research

- Investigated national COVID-19 testing data collection processes, inefficiencies, and standardization challenges.
- Used Miro to visually map the journey of a COVID-19 test from an individual to a national scale, identifying key friction points in data transmission.

TECHNICAL SKILLS & PROFESSIONAL ABILITIES

- Audit & Controls: IT general controls (ITGCs), IT application controls (ITACs), SOX/ICFR, control walkthroughs and documentation
- Data Analysis & Programming: Python (Pandas, NumPy, Matplotlib, Altair), SQL
- Visualization & Tools: Tableau, Excel, Miro
- Research Methods: Qualitative coding, thematic analysis, survey design, user interviews, usability testing
- AI Tools: Microsoft Copilot Studio (agent development), prompt engineering, LLM-assisted qualitative analysis
- Client Communication and Interpersonal Skills
- Team Collaboration
- Analytical & Ethical Reasoning
